

**APPENDIX "A"**  
**Department of Public Safety (DPS)**  
**Hourly Assignment Procedures**

**NOTE:** These procedures are modeled after the AFA's sample policy for hourly assignments. See AFA website (<http://www.santarosa.edu/afa/Contract/Articles/art16.pdf>) for original language.

**1. Hourly Assignment Defined:**

Hourly assignments are all assignments, generally paid on an hourly basis, which remain available after regular, probationary, and temporary faculty assignments have been made or determined.

**2. Eligibility:**

According to the AFA/District Contract, after initial hiring, only faculty with a "satisfactory" or better performance evaluation conclusion shall be considered for an hourly assignment.

**3. Program Needs:**

Generally, minimum qualifications for the discipline will be considered sufficient to meet basic program needs for courses offered. However, the DPS recognizes that certain courses may require special experience and/or expertise on the part of the faculty member in order to meet the needs of students. Recognition of required experience and/or expertise shall be based on the successful completion formal coursework, prior teaching experience, or related but non-academic career experience. Only those faculty members who can demonstrate the required experience and/or expertise will be assigned to the courses requiring special expertise or experience. Specific requirements of each discipline within the DPS are the requirements listed below. It shall be the responsibility of the faculty to demonstrate proof of minimum qualifications as well as any special expertise. Such proof is required before any assignment will be made.

**Administration of Justice:**

See Appendix "A" for specific special expertise topics.

**Emergency Medical Care:**

See Appendix "B" for specific special expertise topics.

**Fire Technology:**

See Appendix "C" for specific special expertise topics.

*Approved*  
*11.6.12 Dmk/rough*

The Discipline Directors, Coordinators and/or Department Chair, in consultation with the Supervising Administrator, will verify documentation of expertise and certifications. If more than one faculty member has the required experience and/or expertise, assignments will be made on the basis of department needs (e.g., the need for an instructor in another course area) or on a rotational basis.

#### **4. Making Hourly Assignments for Fall and Spring:**

After assignments are made to satisfy #2 and #3 above, assignments will be given in ranked order to faculty with the greatest length of service in the department/program (for length of service stipulations, see AFA contract 16.04A5a-b). The Director, Coordinator or Department Chair shall make recommendations for hourly assignments and shall forward them to the Supervising Administrator.

Whenever possible, for those adjunct faculty members with “assignment priority” (the greatest length of service in the department), a “like load” will be offered. “Like load” means the same load that was performed during the previous “like” semester (Fall for Fall, Spring for Spring). Adjunct faculty with assignment priority establish like load, which may be less or greater than 40%. If an adjunct instructor has a like load greater than 40%, the instructor will first be allocated an assignment up to 40%. After all hourly instructors with assignment priority have received their like load up to 40%, then any remaining load will be used to bring instructors up to their actual, higher like load, based on their position on the length-of-service list.

Those adjunct faculty employees without assignment priority may receive an assignment after the “like load” provision for those with an assignment priority has been met.

#### **5. Communication for Semester Length Classes:**

So that information can be used in preparing Proof 1 and 2 for the subsequent term, it is necessary to determine which faculty members are interested in receiving an Hourly Assignment for the next Semester, Intersession or Summer Session. The Department Chair, Director or Coordinator will communicate in writing via a query memorandum or letter, with every department faculty member prior to, or by the end of the second week of the Spring semester and the first week of the Fall semester and by November 10 for Summer Session. The query memoranda will be through the faculty member's SRJC email address.

All dates pursuant to this section are subject to the successful preparation and delivery of scheduling materials from either the Supervising Administrator or other Academic Affairs representatives.

Written response to this communication is requested as promptly as possible, but no later than two weeks from the date of the query memorandum for Spring / Fall Semesters and Intersession or Summer Session. The preferred method of response to query memoranda should be through the SRJC email address of the Department Chair, Program Director or Program coordinator.

The Department Chair, Director or Program Coordinator, will post a copy of Proof 2 as soon as it is available. This posting shall constitute confirmation of Hourly Assignment *recommendations* made by the Department to the District. Posting of Hourly Assignments

may be electronic in nature i.e. posted on Department web site, or sent to the faculty's SRJC email address.

Assignments will be considered "reviewed and approved" when published electronically as part of the schedule of classes for any academic term of instruction. After the initial assignments are made, an hourly instructional assignment may be amended or cancelled to meet district and departmental needs.

## **6. Communication for Short Term Classes including Academy**

The nature of Short Term classes, Academy (block) assignments or other irregularly scheduled classes often requires different or irregular query of adjunct faculty for teaching assignments. Because of this, the Department must conduct notification of class availability and make decisions about staffing outside of the normal methods applied to regular semester length classes.

The Department Chair, Directors or Coordinators in consultation with the Supervising Administrator shall communicate verbally or in writing with adjunct faculty regarding the assignment availability. The primary means of written communication will be through the faculty member's SRJC email address. Adjunct faculty may be queried individually or collectively. The Directors, Coordinators or Department Chair shall query adjunct faculty and make assignments in such a way as to satisfy sections 2 and 3 above and then by length of service to the Department. Adjunct faculty shall have a maximum of 10 calendar days prior to the start date of the short term course to decide to accept or reject the assignment offered.

Semester length assignments will be considered "reviewed and approved" when sent electronically or confirmed in writing. Short Term classes/assignments will be considered "reviewed and approved" when confirmed in writing by Coordinator, Department Chair or Director. After assignments are made, an hourly instructional assignment may be amended or cancelled to meet district and departmental needs.

## **7. Summer Session and Intersession Hourly Assignments:**

Hourly assignments for Summer Session and Intersession are made after regular and probationary faculty assignments have been determined.

"Expertise" in a subject will be taken into consideration when making hourly assignments. Whenever possible, for those adjunct faculty members with "assignment priority" (the greatest length of service in the program/department), up to a 40% load will be offered.

Those adjunct faculty employees without assignment priority may receive an assignment after the "like load" provision for those with an assignment priority has been met.

**8. Review:**

These procedures were e mailed to faculty members on April 30<sup>th</sup>, 2012. These procedures have been provided in electronic format via the SRJC email system to faculty members, reviewed by faculty, and discussed and approved at scheduled department meetings on May 9, 10 and 11<sup>th</sup>, 2012.
